

A guide to conduct items for hairdressers

The following are based on the requirements set out in the Health (Hairdressers) Regulations 1980 for hairdressing salons.

not more than 70.4 percent volume in volume of ethyl alcohol or isopropyl alcohol;

“Disinfecting fluid” means:

- a) Alcohol as defined in this regulation; or*
- b) Any quaternary ammonium compound that, in a solution containing one part in 500 of water weight to volume, has a sterilising effect at least equal to alcohol; or*
- c) Any non-irritant disinfecting solution that has a disinfecting action at least equal to either of the foregoing; and,*

“Effective ultra-violet radiation” means electromagnetic radiation at a wavelength of 253.7 nanometres that has an intensity or at least 100 microwatts per square centimetre, measured at the surface on which utensils and equipment are exposed.

A guide to conduct items for hairdressers

PERSONAL HYGIENE

Hand washing is a basic hygiene must and regular and frequent hand washing is important for a host of reasons. Similarly, presenting in a clean and tidy manner not only creates air of confidence and ability, but gives customer's confidence also.

Keeping combs, scissors or other hairdressing equipment in clothes pockets is to be avoided, as it is not hygienic. Similarly, smoking while hairdressing is a strict "no-no".

Avoid hairdressing if suffering from suppurating skin on the head, neck, arms, or hands to prevent infecting customers. Wait until the condition has cleared before recommending any hairdressing activity.

SANITARY PRACTICES

Clean hairdressing equipment after use or prior to commencing hairdressing on another person.

Place used equipment in a covered container until it is cleaned and disinfected.

All powder puffs, permanent-wave pads, strips, flannels and other similar articles must be used only once and then discarded into the rubbish bin immediately after use.

All liquids, creams, and powders must be stored in clean, closed containers and be taken out using a clean applicator that has been rendered hygienic, or by a clean spatula, or in some other manner that does not permit unused portions to be touched by hands.

Sweep up cut hair after each haircut to prevent hair accumulating on the floor.

Dispose of cut hair into a covered rubbish bin.

DISINFECTING OF APPLIANCES AND EQUIPMENT

Scissors must be cleaned and treated with an appropriate disinfectant or similar prior to use on a new person, e.g., wiped over with a disposable alcohol swab.

When cleaning equipment, e.g. electric clippers and rollers, etc., hair and similar material must be removed prior to washing and subsequent disinfection.

Hairdressing equipment and similar utensils, i.e., rollers, brushes, combs, tool, etc., must be washed in detergent and hot water of at least 43°C after use on each customer and immediately after use on a person with inflamed or suppurating skin and then:

- immersed in an approved disinfectant fluid for the time recommended by manufacturer's instructions to ensure efficiency; or
- placed in boiling water for at least five minutes; or
- exposed to confined live steam for at least five minutes; or
- exposed to ultra-violet radiation for at least 15 minutes (i.e., in an approved UV steriliser unit).

Clippers, electric shavers and similar appliances with non-detachable parts first need to be cleaned by thorough brushing by a brush (provided for this express purpose), and then by wiping the blades with clean cotton wool saturated with an approved disinfectant.

Any item that drops on the floor must be cleaned and disinfected prior to re-use. If not needed immediately, then place it into the covered container with other items waiting cleaning.

Cleaned and disinfected tools must be kept in a clean covered container, separate from that for used items.

Containers used to store clean equipment must be cleaned with a cloth saturated with an approved disinfectant at least once each day that hairdressing is carried out.

TOWELS AND COVERINGS

Clean towels must be kept covered in a clean, dustproof and dry container while awaiting use.

A clean towel or a disposable towel will be placed about the neck of each person prior to placement of any cape and commencing of hairdressing.

Where disposable towels are used on a person's neck, these must be disposed of immediately after use and not re-used.

Towels used on each person must be placed in a covered laundry hamper or similar while awaiting removal for washing.

Towels and any other soiled linen used in connection with hairdressing must be washed in warm water with an antibacterial detergent.

REFRESHMENTS

Refreshments must not be served in areas where hair-cutting is occurring.

Single service or disposable utensils must be provided for customers' refreshments.

[Excerpt from the Health (Hairdressers) Regulations 1980]

"2. Interpretation

In these regulations, unless the context otherwise requires:

"Alcohol" means a mixture of alcohol and water, with or without perfume, wood naphtha, or pyridine, and containing in the mixture not less than 69.5 percent and
