SYSTEM OF CHARGING IN RESPECT OF VOLUME AND STRENGTH OF TRADE WASTES AND SPECIAL WASTES

- 1. Trade wastes producers will be charged the actual cost involved in treating the trade wastes received by Council into the sewer or treatment plant.
- 2. The total cost to Council of receiving, conveying, treating and disposing of wastewater from within its district is made up of capital, maintenance, operating consumables, labour and administration costs.
- 3. The costs for each discharger of wastewater are apportioned to volume, Biochemical Oxygen Demand (BOD₅), Inert Suspended Solids (ISS), Volatile Suspended Solids (VSS), total nitrogen (TN) and total phosphorous (TP) of discharged wastewater, and summed to give the total costs of reticulation to, and treatment at, the treatment plant.
- 4. The average annual volume in cubic metres of all sewage, wastes etc. received at the Council's treatment plant where the trade wastes are treated, during each subsequent financial year, is designated as Q (m³/year).
- 5. The average annual BOD_5 in kilograms of all sewage wastes etc. received at the Council's treatment plant where the trade wastes are treated, during each financial year shall be designated as B_W (kg/year).
- 6. The average annual ISS in kilograms of all sewage wastes etc. received at the Council's treatment plant where the trade wastes are treated, during each financial year shall be designated as D_w (kg/year).
- 7. The average annual VSS in kilograms of all sewage wastes etc. received at the Council's treatment plant where the trade wastes are treated, during each financial year shall be designated as E_w (kg/year).
- 8. The average annual TN in kilograms of all sewage wastes etc. received at the Council's treatment plant where the trade wastes are treated, during each financial year shall be designated as F_w (kg/year).
- 9. The average annual TP in kilograms of all sewage wastes etc. received at the Council's treatment plant where the trade wastes are treated, during each financial year shall be designated as G_w (kg/year).
- 10. The estimated annual cost of receiving and disposing of (but not treatment) all such sewage during each subsequent financial year is designated as C_1 (\$).
- 11. The estimated annual costs to the Council for treatment of all sewage during each financial year is designated as C₂ (\$), and apportioned to volume, BOD₅, ISS, VSS, TN and TP on a site specific basis relating to wastewater treatment processes. The estimated apportionment of costs is shown below, however Council reserves the right to amend the basis of apportionment based on actual operational costs incurred in a given financial year.

Other WwTP								

- 12. Charges in respect of volume of wastes shall be based on either the measured volume of wastewater discharged from the premises or the volume estimated from the measured volume of water entering the premises during the period corresponding most closely with each financial year. This volume shall be designated as V (m³/year).
- 13. The charges in respect of BOD₅, ISS, VSS, TN and TP shall be based on the measured composition of wastewater discharged from the premises during the period corresponding most closely with each financial year. This BOD₅, ISS, VSS, TN and TP shall be respectively designated B_T, D_T, E_T, F_T, and G_T (kg/year).
- 14. The charge for each financial year levied by the Council on the occupier shall be calculated using the following formula:

Annual Trade Waste Charge =

$$\left(C_{1} \times \frac{V}{Q}\right) + \left\lfloor C_{2} \times \left\lfloor \left(\frac{V}{Q} \times Volume\right) + \left(\frac{B_{T}}{B_{W}} \times BOD\right) + \left(\frac{D_{T}}{D_{W}} \times ISS\right) + \left(\frac{E_{T}}{E_{W}} \times VSS\right) + \left(\frac{F_{T}}{F_{W}} \times TN\right) + \left(\frac{G_{T}}{G_{W}} \times TP\right) \right\rfloor \right\rfloor$$

Where Volume, BOD₅, ISS, VSS, TN and TP should be replaced by the relevant percentages shown in (11) above.

In calculating any such charge any domestic sewage discharged from the premises affected shall be deemed to be trade wastes.

- 15. The occupier will also be levied all reasonable costs incurred by Council to measure the discharge volume or characterise the discharged wastewater as required to determine (12) and (13) above.
- 16. Where the trade waste charge calculated, is less than the uniform water closet/ urinal charge which would be applicable to this property, then the uniform water closet /pan charge will apply.
- 17. Council reserves the right to amend this trade waste charging system as required to recover actual operational costs relating to wastewater reticulation, treatment and disposal.
