

In joining the No Spray Register, the resident agrees to take over the responsibility for:

- Eradicating all noxious and undesirable plants;
- Keeping the road frontage clear and tidy;
- Keeping drainage paths free of obstruction and fully operational at all times;
- Keeping vegetation cleared from around signs, posts and other roadside furniture where the mower cannot reasonably reach. A radius of one metre is appropriate in most cases; and
- Ensuring that the “no-spray” markers are in place and remain clearly visible to the spraying contractor.

Note: If these conditions are not maintained and the spraying contractor sees an overgrown frontage, then the operator is required to spray the area as normal.

Applicants Declaration:	
I agree to comply with the conditions described above and understand that if, in the opinion of the spraying contractor, the conditions are not being met the area will be sprayed.	
Applicants Name:	
Applicants Signature:	
Date:	

Where you are not the legal owner of the property, we need permission from them to add these details to the ‘No-spray Register’.

Are you the owner of the property for which you are applying? (Cross out not applicable) Yes / No

If yes, please complete Page 2

If no, please complete Page 2 and have the owner complete the section below:

Owners Declaration:	
I confirm the applicant may register the address specified on Page 2 in the Whakatane District Council’s ‘No-spray Register’ on the condition that the applicant maintains the conditions outlined above. I am aware that failure by the applicant to not maintain the conditions will result in the Contractor spraying the area as normal.	
Owners Name:	
Owners Signature:	
Date:	

Applicant Name:						
Postal Address:						
Telephone:		(day)		(night)		(mobile)

Address and description of no-spray zone: (Include RAPID Number, Route Position ¹ (beginning and end of zone) obvious landmarks and distances)
Sketch of the no-spray zone: (Include landmarks and features described above or attach photos)

OFFICE USE ONLY				
Added to no-spray register:	<input type="checkbox"/> (tick)			
Acknowledgement sent to applicant:	By:	Who sent	On:	Date
Passed to contractor:	By:	Who sent	On:	Date

¹ A Route Position is the distance from the start of a road to an obstacle, or in this case, the start and end of the no-spray zone. Route Positions can be measured using a trip meter in a vehicle. Sometimes culverts are marked with their Route Positions (on a marker) so if you have one near the zone it will help the Contractor establish the area you are requesting.
